## 1<sup>ST</sup> DEEP LEARNING INDABAX CONFERENCE IN MOZAMBIQUE

### I. CONTEXTUALIZATION

In the last years, Artificial Intelligence (AI) and Machine Learning (ML) have been present in the market due to the huge impact of these areas of knowledge in solving problems with autonomous solutions, efficiently and profit full. Although there are strong groups concerned to the areas in Northern America, Europe and Asia focused on the use of the AI and ML. Recently in the African continent, several groups interested on the issues started appearing as the case of Deep Learning Indaba society.

Deep Learning Indaba society is an organization with mission of straightening the use of AI and ML in Africa, with the purpose of having African people not only as simple observers as well as consumers of these technologies but they have to become an active society in the referred technologies, above all create their own technologies to respond to their own needs.

Deep Learning Indaba society has been persuading other African groups interested on organizing events in their own countries in order to create a community of AI composed of investigators and programmers. On the other hands. No African Portuguese Speaking country has ever organized such event, so it is a privilege for Mozambique to take the lead. This event will allow Mozambique to be the first African Portuguese Speaking country to join to the global community of ML in Africa. Thus, it will influence the other African Portuguese speaking countries to follow the same example.

# Faculdade de Engenharia

The main objective for the event is the creation of AI community and ML in Mozambique for collaboration in research and development. In this way, it is intended that in the medium to long term AI will be part of the daily life of Mozambican society, empowering Mozambican scientists in the field (Academic or Industry). This community will allow greater involvement and interaction between all those involved in the researcher for better intelligent solutions for everyday life in society.

## II. BENEFITS FOR SPONSORS

- Company Logo in all advertising media for the event.

## III. TARGET AUDIENCE

The IndabaX conference is aimed for all national researchers that want to create a network of AI/ML in Mozambique. Also, for anyone interested in acquiring knowledge in AI/ML. The event will count with national and international researchers, industry professionals, teachers and students.

## IV. LOCATION

The conference is being organized by the Centro de Estudos e Projectos em Engenharia (CEPrE) da Faculdade de Engenharia - Universidade Lúrio. The event will be online and will take place between the 26th to 28th July 2021

## V. APPLICATION FORM AND DATES

If you want to participate, please send an email to [indabax@unilurio.ac.mz](mailto:indabax@unilurio.ac.mz)

- **Application Open:** 24 May, 2021
- **Application Deadline:** 24 June, 2021
- **Acceptance Notification:** 01 July, 2021
- **Event:** 26-28 July, 2021

## VI. CONTACTS

Phone: (+258) 8454 51296 | 8744 51296
